Mr. Warfield, Presenting Memorial, Says 50,000,000 Urge 6 Per Cent Guaranty.

Principles of the Warfield plan, un der which a minimum interest return of 6 per cent on railroad securities would be guaranteed through a mandatory adjustment of rates by the Interstate Commerce Commission, were indorsed by "fifty million persons owning or directly interested in railroad securities" in a memorial to Congress submitted to the House interstate commerce committee today by S. Davies Warfield, president of the National Association of Owners of Railroad Securities.

Signers of the memorial numbered 5,000 investing institutions, including savings banks, national and state banks, surety companies, trust com-panies and life and fire insurance companies, and 8,189 individual in-vestors. The shipping public also was represented in the indorsement by sixteen municipal trade organizations, with an estimated total manhanish with an estimated total membership of 30,000. Insurance companies giving their indorsement were said to rep-resent 23,000,000 policyholders, while it was estimated that 5,500,000 persons were represented by savings banks.

Asks Solution From Congress.

In presenting the memorial, Mr. Warfield said its signers did not ask "the continuation of autocratic rail-road methods of the past, but a just and definite solution by the Congress of the most important problem now before the country."

Commission's Power Limited.

"The responsibility for the existing system and the duty of conserving transportation in America rests exclusively upon Congress. The Interstate Commerce Commission has not the power, and cannot, consistently with the Constitution, be charged with the responsibility of determining fundamental questions of public policy. We appeal to this Congress to discharge its duty by the only possible method. The first requisite is a mandatory declaration that the power of regulation shall not be employed so as to depress net operating income below the level which experience has shown to be necessary to sustain the carriers.

"The legislation proposed is based upon the necessity that Congress shall by law recognize a minimum percentage return on the aggregate investment as a necessary limitation upon its delegation of rate-making power to the Interstate Commerce Commission, and shall by law enable that commission to comply with the duty to conserve transportation in America."

During July these outside contributions, which have been promised until Congress acts on the Nolan-Kenyon bills for a permanent national employment system, aggregated \$61,424. Because of this voluntary support, which prevented 300 service offices throughout the country from closing or July 1, the service has been able to maintain its previous placement rate, and soldiers and civilian workers were placed in jobs during July at the rate of 60,000 per week. Total placements for July were only slightly under those for June, being 234,683, with reports from several states not yet in. The cost per placement to the government was but 39 cents.
